LinkedIn · GitHub · Open to Remote & On-Site Roles Worldwide

PROFESSIONAL SUMMARY

Innovative Full-Stack Developer with end-to-end product ownership experience — from database schema design to polished mobile UI. Founder of DineEase, a cross-platform restaurant ordering app built on React Native, Node.js, Express.js, and Firebase, recognised as a Top 47 Global Finalist at Venture Z 2026 (143 applications, 35 countries). Currently working as a Front-End AI Intern at FlyRank AI (Chicago, USA) and a Cybersecurity Analyst Intern at DevelopersHub Corporation. Experienced in building RESTful APIs, designing normalised databases, integrating authentication systems, and deploying production-ready full-stack applications.

WORK EXPERIENCE

Front-End AI Intern · FlyRank AI

Jun 2026 – Present · Remote

- ▶ Developing AI-powered front-end features and React-based UI components for a US SaaS product.
- ▶ Collaborating with an international full-stack engineering team on component architecture and API integration.
- ▶ Working closely with backend services to implement and optimise API-driven UI features.

Cyber Security Analyst Intern · DevelopersHub Corporation

May 2026 – 1 month · Remote

- ▶ Performed vulnerability assessments and security audits on full-stack web applications.
- ▶ Identified and documented API-level and database-level security vulnerabilities in development environments.

Cyber Security Intern · Softbond Digital

Jun 2026 – Present · Remote

- ▶ Supporting cybersecurity operations including monitoring, risk analysis, and incident response.

Team Lead – Venture Z 2026 Finalist · ICSDI Conference · Prince Sultan University

Feb 2026 · Riyadh, Saudi Arabia

- ▶ Led DineEase from full-stack prototype to international competition stage — Top 47 Global Finalists.
- ▶ Pitched end-to-end product architecture (frontend, backend, database, and AI features) to international judges.

KEY PROJECTS – FULL-STACK FOCUSED

DineEase – Full-Stack Restaurant Mobile App | React Native · Node.js · Express.js · Firebase · REST API · AI Features

- ▶ Architected and built a complete full-stack mobile application covering frontend, backend API, and database layers.
- ▶ Designed and implemented RESTful APIs with Node.js and Express.js — covering user authentication (JWT), menu management, order creation, and real-time status updates.
- ▶ Designed Firebase Firestore database schema with normalised collections for users, restaurants, menus, and orders.
- ▶ Implemented secure user authentication with Firebase Auth — email/password, session management, and role-based access control.
- ▶ Integrated AI-powered features including personalised food recommendations and smart search within the app.
- ▶ Built the complete React Native frontend — navigation flows, custom UI components, API integration, and state management.
- ▶ Handled deployment pipeline and environment configuration across development and production environments.
- ▶ Delivered end-to-end from idea to international competition — Venture Z 2026 Top 47 Global Finalist.

Inventory Management System | ASP.NET · C# · SQL Server · Full-Stack Web App

- ▶ Designed and built a complete full-stack inventory management system as a university capstone project.
- ▶ Engineered a normalised SQL Server database schema with tables for products, suppliers, categories, and transactions.
- ▶ Implemented full CRUD operations with ASP.NET MVC — product stock management, supplier records, and sales reporting dashboards.
- ▶ Built a clean admin UI with form validation, data tables, and export-ready reports.
- ▶ Completed Jan 2025 – Mar 2025.

College Alert – Full-Stack Notification App | React Native · Expo · Backend API · Push Notifications

- ▶ Built end-to-end notification system — admin backend to push alerts, React Native frontend to receive and display them.
- ▶ Implemented Expo push notification service with real-time delivery and background handling.

- ▶ Designed user and admin role separation with authentication-gated admin dashboard.

MoonVeil – Storytelling Web Platform | *HTML · CSS · JavaScript · Dynamic Frontend*

- ▶ Built a dynamic chapter-based storytelling web platform with JavaScript-driven navigation.
- ▶ Designed a responsive, animated UI with dark theme and custom typography system.

TECHNICAL SKILLS – FULL STACK

Front-End: React Native (CLI & Expo), HTML5, CSS3, JavaScript (ES6+), Bootstrap

Back-End: Node.js, Express.js, ASP.NET (C#), RESTful API Design

Databases: MySQL, SQL Server (normalised schema design), Firebase Firestore

Authentication: JWT, Firebase Auth, Role-Based Access Control

AI & Integration: AI-assisted development, AI feature integration, Firebase Functions

DevOps & Tools: Git, GitHub, Vercel, Postman (API testing), Figma

Security (Applied): Web app vulnerability assessment, API security auditing

Languages: JavaScript, C#, Python, Java

AWARDS & COMPETITIONS

- ▶  Venture Z 2026 – Top 47 Global Finalist (143 applications, 35 countries) — DineEase
- ▶  IdeaRise Startup Challenge – Top 5 Finalist (UK, Remote)
- ▶  ISC Expo 2026 – Participant & Presenter (Islamabad)
- ▶  Organised Final Year Project Exhibition & Hosted University Events at UOG

EDUCATION

B.Sc. Software Engineering · University of Gujrat (UOG) – Hafiz Hayat Campus

Nov 2022 – Aug 2026

CGPA: 3.78 | Final Year GPA: 3.9

Intermediate – ICS (Physics) · Superior College, Gujrat

Sep 2020 – Sep 2022

Score: 1017 / 1100

CERTIFICATIONS

- ▶ Venture Z 2026 Global Finalist Certificate — Prince Sultan University, Riyadh
- ▶ IdeaRise Top 5 Finalist Certificate — UK, Remote
- ▶ Shield Up Cybersecurity Job Simulation — AIG New York CEO Council
- ▶ Frontend Website Designing — Professional Course
- ▶ Machine Learning in Python — Alison
- ▶ Cybersecurity Incident Response & Threat Hunting — Alison
- ▶ HTML & CSS, Java — Open Weaver
